EES Awarded DOE EERE IT Reform Initiative Task 2

GERMANTOWN, MD – December 2012 - Energy Enterprise Solutions (EES), LLC has been awarded the Department of Energy, Energy Efficiency and Renewable Energy, Task 2 addressing the IT Reform Initiative. The task and initiative are EERE-wide with the focus on 3 major concepts:

- Create a new “One EERE” way of doing business by connecting EERE employees nationwide, enhancing collaboration, and providing cutting-edge technology to help employees perform their jobs.
- Increase EERE’s Efficiency and Effectiveness through a single enterprise IT solution.
- Standardize EERE’s Business Processes and Centralize Data.

“We are proud of our long standing partnership with EERE and appreciate this opportunity to support their vital IT mission going forward,” said EES President, William Teel, Jr.

###

About Energy Enterprise Solutions, LLC

EES is a leading systems engineering and security services provider to the US Federal Government. Established in September 2004 as a small business joint venture, EES was formed by an SBA-approved 8(a) Mentor-Protégé agreement between 1 Source Consulting, Inc. and RHRT Holdings, Inc. Since that time, we have grown rapidly into a leading professional services contractor. Working collaboratively with our Federal clients, EES supports the implementation of integrated enterprise-wide operations and capabilities. We provide a broad range of successful performance-based support in program management and control, IT infrastructure and operations, IT management, cyber security, and systems development and engineering across geographically dispersed projects and tasks.
