

EES Appraised at CMMI Level 3

March 22, 2013, Germantown, MD—Energy Enterprise Solutions (EES), LLC today announced that it has been appraised at Level 3 (with Agile processes) of the CMMI Institute’s Capability Maturity Model Integration (CMMI). The appraisal was performed by Process Strategies, Inc.

CMMI is a process improvement approach that provides organizations with the essential elements of effective processes that ultimately improve their performance.

An appraisal at maturity level 3 indicates the organization is performing at a “defined” level. At this level, processes are well characterized and understood, and are described in standards, procedures, tools, and methods. The organization’s set of standard processes, which is the basis for maturity level 3, is established and improved over time.

EES is a leading information technology, systems engineering, and security services provider to the U.S. Federal Government. Established in September 2004 as a small business joint venture, EES was formed by an SBA-approved 8(a) Mentor-Protégé agreement between 1 Source Consulting, Inc. and RHRT Holdings, Inc. Since that time, we have grown rapidly into a leading professional services contractor. Working collaboratively with our Federal clients, EES supports the implementation of integrated enterprise-wide operations and capabilities and provides a broad range of performance-based support in program management and control, IT infrastructure and operations, IT management, cyber security, and systems development and engineering across geographically dispersed projects and tasks.
